Theo Voss becomes global Head of Network & Infrastructure

—

Cologne/Klagenfurt, 05.08.2017: Anexia, global provider of managed hosting, cloud solutions and software development with headquarters in Austria and four German offices, has signed Theo Voss as the new Head of Network & Infrastructure. He comes from the managed hosting provider SysEleven from Berlin, where he was last active as Team Lead Network. In his new role, Voss will head the Network Operations & Infrastructure Services department from Vienna, ensuring the quality and availability of Anexia's global data center, network and backbone infrastructure. In addition to this function, the passionate pilot and travel blogger will also appear as a speaker at conferences and represent the company in the network community. Theo Voss started his career in 2009 with the energy service provider MVV Enamic, where he was responsible for setting up the service provider infrastructure.

Alexander Windbichler, founder and CEO of Anexia, comments: "With Theo Voss, we have found a renowned expert for an important leadership position. Security and availability are key quality features of our services and a complex task at over 80 server sites across all continents. With his competence, experience and dynamics, Theo Voss is a perfect match for these requirements."

About Anexia

Anexia was founded by Alexander Windbichler in Klagenfurt, Austria in 2006. The IT service provider offers high-quality and individual solutions in the area of cloud and management hosting as well as customized software and app development. At the same time, Anexia also operates its own independent computer centers. With more than 150 employees in 10 branch offices in Europe and the USA, Anexia has over 80 international server locations and provides services for around 10,000 active customers.
