## Hex awarded at the VCÖ Mobility Award Carinthia 2021

---

For the 30th time, the jury of the VCÖ (Verkehrsclub Österreich [Austrian Transport Club]) is awarding the Mobility Prize for Carinthia to creative and individual mobility projects. Hex GmbH (part of the Anexia Group) was able to convince in the field of digitalization.

**Klagenfurt, 09/16/2021:** The 30th presentation of the VCÖ Mobility Prize Carinthia took place on September 15th with the motto "A new start in mobility". The award was given to innovative projects that dealt with ecological, economically efficient and/or sustainable topics in the field of mobility. Hex was able to leave all submitted projects in the field of digitalization behind and was awarded in cooperation with the ÖBB for the project "hex.ai - Solving complex planning problems in rail freight transport through AI". The project includes the development of a planning system that uses artificial intelligence to make locomotive and personnel planning easier.

"With our pilot application costs, time and CO2 emissions could be saved by 5-10%. The automatically generated and optimized locomotive rotation plans required fewer locomotives and empty mileage than the manually created plans. In addition, our pilot application is currently being continuously expanded as part of a group-wide project and supplemented with additional components in order to support the entire strategic and operational logistics planning of ÖBB in the future", says Philipp Hungerländer, founder of Hex GmbH, and adds: "For us it is a great pleasure to help to make the most environmentally friendly mass transport with AI software even more competitive and at the same time environmentally friendly and to be able to make contributions in the areas of mobility and sustainability."

### About Hex

Hex was founded in summer 2017 from Klagenfurt mathematics professor Philipp Hungerländer. The core competence of Hex GmbH is in the development of algorithms for the optimization of logistics processes. Hex GmbH has been part of the Anexia Group since 2021 under the management of Alexander Windbichler. For more information, visit [hex-solutions.com](https://hex-solutions.com).

### About Anexia

Anexia was founded in 2006 by Alexander Windbichler in Klagenfurt, Austria. The IT service provider offers high-quality and individual solutions in the field of cloud and managed hosting as well as individual software and app development. At the same time, Anexia also operates its own independent data centers. With around 300 employees in more than ten offices in Europe and the USA, Anexia has around 100 international server locations and serves around 100,000 active customers.
